Tracking of GPS / Position

Target release	1.0
Epic	⚡ **S3GP-6** - Tracking of GPS / Position `TO DO`
Document status	`ACCPETED`
Document owner	Jordi Huntjens
Designer	
Developers	
QA	

Goal

- To see where the asset is and has been.

Background

Why are you doing this?

- A manager wishes to see if the position of an asset is within certain parameters. And to see if an asset is moving?
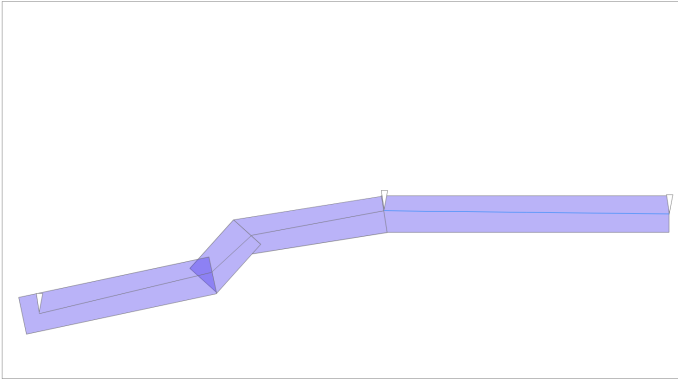

Assumptions

- Users will primarily access this feature from a tablet or laptop.

Requirements

#	Titel	User story	Importance	Notes
1	Show asset position	As a manager, I want to be able to visualize the location of an asset, so I can see where they are. 🔖 ~~S3GP-20~~ `DONE`	Must	- Involves map (google map, openstreetmap)
2	Show position history	As a manager, I want to be able to see the route history of an asset, so I can see where they have been. 🔖 ~~S3GP-21~~ `DONE`	Must	- Involves map (google map, openstreetmap)
3	Export a route	As a manager, I want to be able to export the route an asset has taken, so I use it somewhere. ⚠️ S3GP-22 - Jira project doesn't exist or you don't have permission to view it.	Could	- exporting to CSV
4	Import a route	As a manager, I want to be able to import a route, so an asset knows where to go. ⚠️ S3GP-23 - Jira project doesn't exist or you don't have permission to view it.	Should	- uploading and processing

User interaction and design

Route

Questions

Questions	Resolution
Should we export a route in more formats?	

Won't do

- Make custom map visualization
